

## ***Statement of Purpose***

In the face of continuing and rampant police violence against Blacks, Latinos, other people of color, and all oppressed people, there is an urgent need for a united front of organizations and individuals to organize, strategize and mobilize our communities against police violence.

This campaign will seek to develop new means of exerting community control over local police policies, procedures and conduct.

To that end, this people's campaign will develop and fight for needed legislative change to both create and maintain community control, oversight, and accountability of the police.
